mqtt/1.0.1/mqtts31.js" type="text/javascript">
  </script>
  <script type = "text/javascript" language =
"javascript">
    var mqtt;
    var reconnectTimeout = 2000;
    var host="192.168.1.206"; //change this
    var port=9001;

    function onConnect() {
      // Once a connection has been made, make a
      subscription and send a message

      console.log("Connected ");
      // mqtt.subscribe("sensor1");
      message = new Paho.MQTT.Message("Hello
World");
      message.destinationName = "sensor1";
      mqtt.send(message);
    }

    function MQTTconnect() {
      console.log("connecting to "+ host +" "+
port);
      mqtt = new Paho.MQTT.Client
(host,port,"clientjs");
      // document.write("connecting to "+ host);
      var options = {
        timeout: 3,
        onSuccess: onConnect,
      };

      mqtt.connect(options); //connect
    }
  </script>
</head>
<body>
<h1>Main Body</h1>
  <script>
    MQTTconnect();
  </script>
</body>
</html>
```

Import MQTT client code from host on web

Start our script code functions

Publish topic=sensor1

publish message

Create client object

Callback function

Connect

Call connect function
